background

Jeff Burns, a native to San Diego, has been practicing as a Licensed Architect for five years, with a degree in architecture from the University of Arizona, and Master of Business studies at San Diego State University.

While working at Architects | Delawie Wilkes Rodrigues Barker for two years, Jeff was involved with the Master planning and tower addition to Qualcomm's campus headquarters, visible from the 5/805 merge. The ninety million dollar project includes two parking structures, 400,000 sf of office space, research laboratories, and conference rooms, and a manufacturing area. The project was driven by an auditorium for chamber music and outdoor amphitheater for outdoor performances. Other work experience in their office included multiple tenant improvement projects for the biotech and high tech industries, the Kimpton Boutique Hotel in downtown San Diego, and expansion of the pool and recreation area at The Four Seasons in La Costa.

With a desire for closer working relationships with clients and contractors, Jeff moved to Dominy and Associates to work on churches and housing projects for three years. Work experience included the master planning of College Avenue Baptist Church, La Mesa First Methodist, and Pacific Coast Church in San Clemente. While at Dominy, Jeff assisted in preparation of drawings for Senior Community Centers for a 50,000 sf, 200 unit residential project for low income seniors, complete with commercial kitchen producing 2000 meals a day. Drawings were completed on a fast track schedule to meet requirements for federal

funding. Jeff was also project manager on several custom housing projects, most notably Windansea Beach homes in La Jolla. The 32,000 sf project includes 8 detached homes with car lifts, elevators, smart home technology, and framed views of Mt. Soledad and the Pacific Ocean.

Jeff worked with Public for two years, managing projects, assisting others with design and code compliance, and providing support for the computer network. He was Project Architect on a 14 unit, 28,000 sf condominium project in Barrio Logan, currently under construction, and a 103 unit, 240,000 sf condominium project in University Heights, in the design phase. His responsibilities include design, discretionary approval and permitting, preparation of construction documents, and construction administration.

With a desire to move to greener climate Jeff arrived in Portland Oregon last year and worked at the offices of Mahlum architects, as project architect for a 65,000 sf new elementary school for the North Clackamas School District, with responsibility for a team of consultants and in-house staff, delivering a project on time and within budget.

Recently Jeff has been involved in several residential remodel projects, including drawings, budgeting and currently, hands on work in the field with clients and contractors. Jeff has a unique ability to draw from multiple experiences and talents to deliver insightful project that meet client needs and budgets.
